HIMANSHU SHARMA

6230723508 | hs2660815@gmail.com | Shimla, Himachal Pradesh | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Final-year B.Tech. CSE student with hands-on experience across the ML lifecycle — data cleaning, EDA, model training, evaluation, and deployment. Proficient in Python, scikit-learn, PyTorch, and Streamlit, with practical exposure to reinforcement learning, NLP, AutoML pipeline design, and containerized deployment with Docker. Strong communicator with experience presenting technical work to non-technical stakeholders. Seeking full-time, internship, or freelance ML/Data Science opportunities.

EDUCATION

Himachal Pradesh Technical University, Hamirpur 2023 – 2027

B.Tech. in Computer Science Engineering

Relevant Coursework: Machine Learning, Deep Learning, Optimization Techniques, Data Structures & Algorithms, DBMS

TECHNICAL SKILLS

Languages: Python, C, C++, SQL

ML / DL Frameworks: scikit-learn, PyTorch, TensorFlow

Data & Tools: Pandas, NumPy, Matplotlib, Seaborn, Streamlit, Jupyter, Git/GitHub, Docker

Core Concepts: EDA, Feature Engineering, Model Evaluation, Reinforcement Learning, NLP Fundamentals, SMOTE, Recommendation Systems, AutoML Design

PROJECTS

Problem-Aware Automated Machine Learning (AutoML) System | *Python, scikit-learn, Streamlit, Docker | Capstone, Inphora Pvt. Ltd. Industrial Training*

- Built an end-to-end AutoML platform: automated dataset profiling, data-quality diagnostics, rule-based preprocessing, and algorithm auto-selection based on inferred problem type.
- Implemented a multi-model engine that automatically selects and evaluates Logistic Regression, Random Forest, SVM, and KNN, then presents results via a Streamlit UI.
- Containerized the application with Docker for consistent, portable local deployment.

Autonomous Driving Simulation using Reinforcement Learning (Capstone, Group Project) | *CARLA Simulator, Python, SAC*

- Designed and trained an SAC RL agent in CARLA to follow lanes and avoid collisions by shaping the reward function; collaborated in a group of four on environment setup and evaluation.

Credit Card Fraud Detection System | *Python, scikit-learn, Pandas*

- Built a fraud-detection pipeline on 284,807 transactions using 20:1 undersampling; compared Logistic Regression, Decision Tree and Random Forest, selecting Random Forest (F1 0.76, precision 0.74, recall 0.78, ROC-AUC 0.96).

Mood-Based Movie Recommendation System | *Python, scikit-learn, Streamlit*

- Built a content-based recommender on the TMDB 5000 dataset using CountVectorizer and cosine similarity, deployed via an interactive Streamlit app.

PROFESSIONAL EXPERIENCE

AI/ML Trainee — Inphora Pvt. Ltd., Mohali Jun 2026 – Aug 2026, 6 Weeks

- Completed a 45-day project-based training covering Python, NumPy/Pandas/EDA, classical ML, deep learning with PyTorch (CNNs, RNNs/LSTMs), and Transformer-based NLP; capstone deliverable was the AutoML platform above.

Data Analytics Job Simulation — Tata Group (Tata iQ) — Forage April 2026

- Conducted GenAI-powered EDA for a Financial Services use case, proposed a no-code predictive modeling framework for delinquency risk, and designed an AI-driven collections strategy with ethical/regulatory considerations.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (Oct 2025)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Oct 2025)
